

Internal Door Ironmongery

We use 'Frank Allart' Ironmongery as we believe they offer the highest possible standards to meet the aspirations of each individual customer request. Unlike many other companies, Frank Allart offer solid brass, long lasting, high performing products with a vast variety of designs. Over time, the colour and texture variation will gradually wear and oxidize which gives more character and elegance to these items in their own specific way.

Below you will see 4 of the most popular standard handles we offer. All handle designs come with either the round rose or standard backplate.

For the full document on all handle styles that we offer, including other standards and some premium handles, please let us know. The backplates come in various sizes which will also be shown on this document.

57 Series 5722

61 Series 6102

90 Series 9032

55 Series 5512

With the round rose, you will have a separate escutcheon (*1885 & 1867*)

57 Series 5753

61 Series 6123

90 Series 9023

55 Series 5523

Please note, all internal doors come without a lock unless this is requested.

Your quotation currently includes all ironmongery to be finished in Satin Brass Lacquered /Unlacquered (SB/U) or Polished Brass Lacquered/Unlacquered (PB/U) unless otherwise specified. Other finishes are available however please note that they will incur additional costs. Please see PDF for all other options.

Please see to the left both options fitted to our lock box to give you an idea of the aesthetics

Hinges:

Butt Hinge

Bullet Hinge

Butt Hinge: These are heavy duty hinges that are already included in the cost of your quotation.

Bullet Hinge: These are also known as projection hinges, they have acquired this name as they have the facility to project further than the butt hinge. These come at an additional cost (POA). *We are unable to offer Bullet hinges on a fire door.*

Locking:

Whilst locking mechanisms are not always necessary for internal doors, if these are required please see options below.

More technical information is available upon request.

5 Lever Lock

Latch bolt withdrawn by lever handle from either side.
 Deadbolt locked or unlocked by key from either side.
 Can be keyed alike.
 Anti-pick and anti-saw security features.
 Kitemarked, tested to BS 3621: 2007.

Latch Only

Latch bolt withdrawn by sprung lever handle from either side.

Note: this lock is not suitable for use with non-sprung handles.

Door will be non-locking.

Cylinder Lock

Latch bolt withdrawn by lever handle from either side.

Deadbolt is locked or unlocked by euro profile cylinder.

Cylinder options: key operated from either side, or key operated outside with thumb turn inside.

Can be keyed alike.

Recommended for internal doors only, as this is not supplied with the security escutcheon shown, and therefore is not kitemarked.

For double leaf doors, there will be a handle and locking system on the master leaf. On the slave leaf, there will be a concealed bolt which will enable the door to remain shut when unused and also have the ability to open and to maximise space. These are key operated. Please see image to the left.

Extras:

Restrictors: These are used to restrict the door opening to a desired angle.

Additional £ 27.00 + VAT per leaf

Kick plates: These are mainly used for aesthetic purpose however they also have the practical purpose of limiting the risk of damage to the bottom of the glass.

Additional £ 183.00 + VAT double door

Additional £ 93.00 + VAT single door

Bead Options:

Aluminium stick on bead.

Steel clip on beading is available.

This does not come as standard. *P.O.A*

Aluminium

Steel

Closure: Designed to slowly bring the door back to a closed position.

Additional £ 197.00 + VAT per leaf
